

Vlad Kuzmenko

iOS Developer

Kyiv, Ukraine | +380501376940 | tj.vlad@gmail.com | LinkedIn: linkedin.com/in/vlad-kuzmenko-591149292 | GitHub: github.com/mooooove08 | Telegram: @mooooove08

Profile Summary

iOS Developer with 4+ years of experience building and maintaining commercial mobile applications across consumer, product and game-related domains. Experienced in full mobile application lifecycle: technical design, UI implementation, API integration, Firebase services, TestFlight builds, App Store releases and post-launch support. Strong focus on clean UIKit implementation, practical architecture, maintainability, performance and user experience.

Work Experience

Mar 2024 - Apr 2026

Middle iOS Developer · Banda Apps

- Owned end-to-end development of iOS features from concept and technical design to App Store release and post-launch support.
- Designed and implemented scalable mobile features using Swift, UIKit, SwiftUI and SpriteKit with focus on performance, maintainability and smooth UX.
- Integrated Firebase and REST APIs to support real-time, data-driven application functionality and analytics-oriented product behavior.
- Worked with product and design teams to clarify requirements, improve feature flows and support user engagement improvements.
- Took responsibility for App Store releases, including build preparation, versioning, TestFlight checks, production updates and post-release fixes.

Jan 2023 - Mar 2024

Junior iOS Developer · Techniqum

- Built and maintained iOS applications using Swift, UIKit and SpriteKit, implementing features from UI layout to business logic and data flow.
- Created UIKit interfaces and user flows with attention to clarity, consistency and device adaptability.
- Integrated Firebase and external APIs to support core app functionality, persistence and dynamic content.
- Participated in App Store release preparation, build testing and production updates.

Mar 2022 - Jan 2023

iOS Developer / iOS Intern · Ryazantseva Creative

- Started as an iOS intern in a Ukrainian marketing agency and worked on real client-driven mobile projects.
- Developed UI components and basic features using Swift and UIKit.
- Worked with GitHub, Figma and Trello in a team-based environment and progressed from guided tasks to independent feature implementation.

Selected Projects

Daily List: UIKit checklist app with templates, color/icon customization, themes, archive flow and local persistence using UserDefaults + Codable.

Chickens & Beast: UIKit local multiplayer party-game prototype with hidden roles, events, voting, timers, eliminations and end-game states.

Crypto Market App: Portfolio/test-assignment project demonstrating REST API integration, MVVM, async/await, list/detail flow, image loading and favorites storage.

Technical Skills

iOS & UI Swift, UIKit, SwiftUI basics, Auto Layout, SnapKit, XIB, UITableView, UICollectionView, reusable UI components	Architecture MVC, MVVM, SOLID, Clean Architecture basics, Repository pattern, Dependency Injection basics
Networking REST APIs, URLSession, JSON decoding, DTO/domain models, async/await networking, error handling	Concurrency GCD, OperationQueue basics, Task, MainActor, actors basics, race condition prevention
Data & Services Firebase, UserDefaults, Core Data, local persistence, Firebase Analytics / event tracking patterns	Games / Media SpriteKit, GameplayKit basics, CoreMotion, AVFoundation, animations, physics/collision logic
Tools Git, GitHub, CocoaPods, TestFlight, App Store Connect, Xcode, Figma, Trello	

Education

Donetsk National Technical University - Master of Economic Cybernetics, 2010 - 2015
